

400 SERIES

This versatile crimping tool eliminates human effort in four-indent crimping of pin and socket contacts as well as solderless terminals. Non-adjustable die heads, interchangeable between Models 400, 400-BHD, and 400-B-1 are available from stock to handle No. 26 wire through 4/0 • all using the same safety cycling “Crimpmaster” power unit.

Factory air pressure is now sufficient for even the largest sizes - made possible by the addition of a power booster as standard equipment. The Model 400 Crimpmaster is also supplied with a bench mount as standard equipment, and can be used as a portable hand tool, a bench-mounted hand tool, or a foot controlled unit.

Patent No. 3,173,341
