

## **600 SERIES AUTOMATIC FEED CRIMPING MACHINES**

Pico has completed development of a series of Automatic Feed Crimping Machines to accommodate #12 thru #22 closed barrel contacts.

These machines will accept shoulderless and shoulder type contacts.

These machines utilize a full cycle control crimping mechanism and will meet all performance requirements of applicable specifications.

The Machine's cycle rate is capable of 2,000 per hour. Actual production cycles will vary depending on environment workflow - typical rates are approximately 1,200- 1,400 per hour.

Pico manufactures two basic systems which are designed to accommodate the spectrum of connector contacts now in use.

### ***Feature Highlights***

- ❖ Cycle rates to 2,000 crimps per hour.
- ❖ Accommodates shoulderless and shoulder contacts.
- ❖ Interchangeable Feed System Tracks.
- ❖ Programmable Pneumatic Logic Control
- ❖ Power requirements are 110 volt, 60 cycle AC
- ❖ 80 psi air pressure.
- ❖ 20" wide by 24" deep and 12" high.
